

Valiant Laser Rangefinding Monocular

This is an extremely effective angle-compensated laser rangefinding monocular for archers and rifle shooters. Using the primary HCD (Horizontal Component Distance) mode, it provides key angle compensated range information required by the vast majority of shooters in a simple, quick to read display. In addition to HCD mode, the rangefinder also provides a LOS (Line of Sight) mode. The user can utilize the Scan Feature and has the ability to switch the range display to Yards or Meters.

CATEGORY	PARAMETER
Magnification	6x
Objective Lens	20mm
Max Reflective Range	914 m
Tree Range	731 m
Deer Range	457 m
Minimum Range	4.5m
Accuracy	±1m @100m

CATEGORY	PARAMETER
Maximum Angle Reading	± 60°
Field of View	114m/1000m (6.5°)
Eye Relief	15mm
Battery Type	CR2
Battery Life	~5000 Range Cycles
Dimensions	96x74.6x35mm
Weight w/ Battery	156g
